

DATA.
SCIENCE.
DECISIONS.

WHAT CAN SAIG DO FOR YOU?

SAIG stands for the Statistical Applications & Innovations Group. We have been offering statistical collaboration services to the Virginia Tech research community since 1948. Faculty and students can take advantage of:

- Walk-in Consulting Hours*
- Short*
- Short Courses* & Seminars*
- Proposal Preparation
- Long Term Collaboration

*Denotes free services to Virginia Tech faculty and graduate students from participating Colleges. See website for details.

POWER YOUR RESEARCH WITH SAIG

Sound Design. Whether you are working on social science or rocket science, we can create the study or experimental design to achieve your research objectives. We can maximize information given your resources with sound design.

Appropriate Analytics. How do I demonstrate statistical significance? What do I do with my non-normal data? Logistic regression or tree model? Text mining? Bayesian or frequentist? We can sort these issues out by collaborating on appropriate analytics.

Intelligent Interpretation. So, you have statistical results and you are ready to publish or report to your sponsor. You ask: What is the proper way to communicate my conclusions? What visuals support my data analysis? We've got your back with intelligent interpretation.

Growth. Onward and upward with SAIG. Sound statistical design, appropriate analytics, and intelligent interpretation are key elements in producing your best proposals and publications. Partner with SAIG and the sky is the limit on your research growth.

Your easy button for data-based research, study design, analysis, and reporting. What are you waiting for? Be sage. Contact SAIG.
